

Venstar Duct Temperature Sensor ACC0435

STANDARD FEATURES:

- This sensor is designed to be placed in the duct, and is made with plenum-rated cable. A grommet is included to protect the cable from the edge of the sheet metal, and wire nuts are provided for wire connections.
- Sensor can be used to measure indoor or outdoor air temperature.
- If used indoors as a remote temperature sensor, the sensor will read room temperature and send the information to the thermostat.
- If used outdoors, the sensor can be used to provide outside temperature information (which is not used to control heating or cooling).
- Acceptable Wire Types: CAT5, CAT5e, or CAT6 network communication cable, unshielded with 4 twisted pairs of 24 gage solid wire
- Maximum distance between sensor and thermostat using 24 gauge wire — 250 ft
